Career Objective

Curious and impact-driven Computer Science graduate passionate about building scalable back-end systems and intelligent ML solutions. Eager to work in innovation-focused teams at elite tech companies to solve real-world problems using code, data, and cloud technologies.

Technical Skills

Languages: Python, Java, SQL, JavaScript, C

Frameworks: Flask, Streamlit, Spring Boot (learning)

Tools: Git, GitHub, Postman, Docker, JIRA, VS Code

Cloud & DevOps: AWS (used in projects), Kubernetes (intro), GitHub Actions

Concepts: REST APIs, OOP, SDLC, Agile, Unit Testing, Data Structures, Algorithms

Education

B.Tech in Computer Science Engineering

2021 – 2025

Sanketika Vidya Parishad Engineering College, Visakhapatnam

CGPA: 7.54 / 10.0 (Top 15% of class)

Projects

Secure File Storage using Hybrid Cryptography

Flask, Python, AES, RSA, SQLite

- Developed a secure file-sharing platform using AES & RSA.
- Managed 150+ encrypted uploads; achieved 95% encryption efficiency.
- Implemented modular REST APIs and session-based authentication.
- GitHub: Secure-File-Storage

Real-Time Task Manager with Cloud Deployment

Flask, JavaScript, Docker, Kubernetes, AWS

- Built and deployed full-stack task manager using Docker and AWS.
- Sustained 10+ concurrent users; integrated CI/CD via GitHub Actions.
- Simulated agile delivery and container orchestration.
- GitHub: RealTime-Task-Manager

Disease Prediction using Machine Learning

Scikit-learn, Streamlit, Pandas

- Trained classifier with 85% accuracy; reduced model error from 0.25 to 0.12.

- Deployed using Streamlit for real-time predictions.
- Colab: Disease Prediction Notebook

Internship Experience

Data Science Intern – IBM SkillsBuild (via Edunet Foundation) Jan – Mar 2024

- Built ML models using Python & Scikit-learn on real datasets.
- Collaborated in Agile sprints and practiced Git-based workflows.

Python Developer Intern – Devskill Hub Apr – May 2024

- Developed backend Flask APIs with user auth and unit testing.
- Managed version control and API documentation.

Certifications

IBM SkillsBuild – Data Science with AI (2024)

Python Internship – Devskill Hub (2024)

ServiceNow: Welcome to ServiceNow – ServiceNow University (2024)

Highlights

- Deployed cloud-native apps using Docker, Kubernetes, and AWS.
- Strong GitHub profile with reproducible builds and clear documentation.
- Familiar with agile workflows, QA processes, and CI/CD pipelines.
- Solving 100+ LeetCode problems (aiming for <100,000 global rank).
- Participating in Codeforces, AtCoder, and Kaggle contests.
- Working toward 3-star CodeChef rating and Top 20% LeetCode percentile.
- Contributing to open-source and building personal GitHub Pages portfolio.
